

AI Timetable System Testing Dataset

Sample PDF dataset for testing Smart School Timetable AI

This document contains sample data for testing an AI-powered school timetable system. The dataset includes classes, subjects, teachers, availability, and scheduling constraints.

Classes

Class ID	Class Name	Level	Students
1	S1A	Senior 1	42
2	S1B	Senior 1	40
3	S2A	Senior 2	38
4	S2B	Senior 2	41

Teachers and Subjects

Teacher	Subject	Hours/Week	Availability
Jean Claude	Mathematics	5	Morning
Alice Uwase	English	4	Afternoon
Eric Mugisha	Physics	3	Morning
Mary Keza	Chemistry	3	Full Day
Patrick Niyomugabo	Biology	2	Morning
Grace Ishimwe	History	2	Afternoon

Scheduling Constraints

Constraint	Description
No Conflict	A teacher cannot teach two classes at the same time.
Availability	Teachers should only be assigned during available periods.
Balanced Schedule	Avoid too many consecutive lessons.
Room Management	One room per class session.

Expected AI Features

- Automatic timetable generation
- Teacher conflict detection
- Subject-hour balancing

- AI-based optimization
- Smart teacher allocation
- Future support for machine learning

Prepared for Smart School Management System Testing
